

peduncles, male calyces dissected to the base, and narrower female sepals.

3. *Eriocaulon tuyamae* Satake, sp. nov. (Figs. 3-4)

Acaulis. Folia subrigida, 2-3 cm longa, basi 3 mm lata, apicem sensim angustata, 7-9 nervia, ciliolata. Pedunculi 5-23 cm alti, 5-costati, ciliolati, vaginis 1.5-4 cm longis, ciliolatis, apice oblique fissis. Capitula ovato-globosa, 3-5 mm in diametro, in sicco straminea. Bracteae involucrantes oblongo-ovatae, 2.5 mm longae, apice obtusae, dorso ciliolatae. Receptaculum dense pilosum. Bracteae flores ♂ et ♀ subsimiles, rigidulae, oblongo-ovatae, 2.5-3 mm longae, apice longe acuminatae, dorso ciliolatae. Flos ♂: sepala ad medium in spatham antice fissam connata, apice trilobulata, lobulis lanceolatis acutis glabratibus; petala in tubum apice trilobulata connata; stamina 6, antheris atratis. Flos ♀: sepala 2-3, libera, lanceolato-navigularia, 2 mm longa, glabriuscula, lateralia carinata et saepe anguste alata; petala 3 vel 1, rarius nulla, linearia, 2 mm longa, apice sparse pilosa, eglan-dulosa; stigmata stylis longiora; semina incompleta.

Hab. Laos: 2 km south of Ban Phu Phao, ca. 23 km N.E. of Phangsavanh (T. Tuyama, Jan. 2, 1958, n. L. 57378-Type in TI).

This species is near to *E. lanigerum* Lecomte in having ciliolate leaves, peduncles, vaginas, involucral and floral bracts, however the female sepals are glabrous and carinate or narrowly alate on the back side.

○*Campanula canescens* Wall. 台湾に産す (山崎 敬) Takasi YAMAZAKI: *Campanula canescens* Wall. found in Taiwan

東京大学の標本室に未整理で保存されている標本の中に、キキョウ科の草がある。一年草で高さ 20-40 cm, 上部の葉腋に数個から 10 数個の、長さ 5 mm ほどのごく小さな花が円錐状にまばらにつき、セイタカカナビキソウ *Scoparia dulcis* のような外観をもつが、子房下位なので容易に区別できる。これはインドから華南にまで分布し、中近東、西アフリカまで広がっているらしい *Campanula canescens* Wall. である。台湾からは今まで報告されていないようである。

*Campanula canescens* Wall. ex A.DC., prodr. 7: 473 (1838). Clarke in Hooker, Fl. Brit. Ind. 3: 439 (1881). Danguy in Fl. Indo-Chine 3: 685, f. 77, 1-5 (1930).

Distr. Ceylon, central to northern India, Himalayas, Burma, Indo-China and southern China. New to Taiwan.

Hab. Taiwan: Taitung, Mukua 木瓜 (Kawakami et Kobayashi, April 26, 1906, no. 1484). Taitung (T. Soma, March, 1913). Chia-y Hsien, Kuan-tzuling 関子嶺 (Y. Shimada, March 18, 1918). (東京大学理学部)
